AB Pyrrolidinones (I, R = H, lower alkyl) were prepd. by treating butyrolactone (II) with the appropriate amine in a reactor followed by distn. to recover unreacted amine. E.g., MeNH<sub>2</sub> and II at a molar ratio of 1.5-2.5 were heated to 230-300.degree. in a reactor in the prepn. of I (R = Me) and the unreacted MeNH<sub>2</sub> was distd. and then treated again with II.
